

Brandon Testing notes

- Home option doesn't link to anywhere
- Game doesn't automatically reset once game over is reached I have to manually either reload the page or exit and press play game again
- Does not keep track of score or atleast does not visualized it to the player
- Sometimes if I press the arrow keys too rapidly I get a game over despite not touching the wall or the snake
- If the snake is going down and I press the right and up arrow key at the same time I get a game over
- How to play does not bring up instructions

Manmeet QA Testing Notes:

- I discovered that the button "How to Play" does not give any instructions and does not respond when clicked.
- The Game does not show the player stats and does not assign any player ID
- The Game should let the players have their own color as an Identity.
- There is a crash in the game saying Game Over when the arrow buttons are clicked simultaneously.
- There are no scores.
- There also should be auto reset and pause feature in the game as well
- The game should have an exit button as well
- The game should have an Introduction or a Title at Home.
